- Sandbox - Pre-production test
- Production - No planned downtime
- Production - Alternate date if downtime is required
- DB Maintenance - active DB maintenance is conducted Fri 11:00p-11:30p CST/CDT, and Sat 7:00a-8:00a CST/CDT. During this window, it is expected there will be intermittent degradation of performance, up to five minutes of elevated API response time, an increase in error rates due to failover, and a restart of services.
- Sandbox IT Patching - Begins at 1:00a CST/CDT.
- Production IT Patching - Begins at 1:00a CST/CDT. APIs should remain accessible; however, some increased latency is expected. Long running jobs will have been restarted and could cause delays to a production release
